### Description

---

The ultimate goal of Omni Akuatika is to perform maximum exchange of research works between Indonesian and world-wide scientists. **OmniAkuatika** is a scholarly refereed research journal which aims to promote the theory and practice, innovation, engineering and management as well as social-economic relevant in *fisheries and marine sciences* fields. The main aspects of research areas include, but are not exclusive to the current research on cells, organisms, populations, ecosystems, or processes that affect aquatic systems in the field of fisheries and marine science. The journal also welcome other aquatic relevant aspect related to the transport, fate, control of nutrients and abatement of pollutants in the aquatic environment as well as the ecosystem rehabilitation.

The following contribution might be classified:

- Research Paper
- Short Communication
- Review
- Special Issues

#### Audience

The authors and readers are students, scientists, and regulatory experts from the academic, industrial, and government sectors worldwide. Master thesis and part of dissertation research work might becoming the potential contributors

## Editorial Board

---

### Editor-in-Chief

Dr. Agung Dhamar Syakti, *Marine Pollution and Bioremediation*, Jenderal Soedirman University-Indonesia

### Associate Editors:

- Dr. Hamdan Syakuri, *Parasitology*, Jenderal Soedirman University -Indonesia
- Dr. Maria Dyah Nur Meinita, *Macroalgae*, Jenderal Soedirman University-Indonesia
- Dr. Norman Arie Prayogo, *Fish Reproductive Biology*, Jenderal Soedirman University – Indonesia

### Editors:

- Dr. Agus Salim, *Environmental Modelling*, State Islamic University Syarif Hidayatullah Jakarta, Indonesia
- Dr. Ahmad Syukri, *Environmental Management*, Itec Solution Indonesia
- Dr. Elfithri Rahmah, *River-based management*, LESTARI, Malaysia
- Dr. Endang Hilmi, *Mangrove Ecology*, Jenderal Soedirman University, Indonesia
- Dr. Hendra Yusran Siry, *Marine and Fisheries Socio-Economic*, Ministry of Marine Affairs and Fisheries - Indonesia
- Dr. Imam B. Sosrowijoyo, *Biogeochemistry*, Lemigas, Indonesia
- Dr. Maria M. Ulaszewska, *Pollutants Risk Assesment*, Fondazione Edmund Mach, Research and Innovation Centre- Italy
- Dr. Moussa Mahdi Ahmed, *Hydrosciences*, Research Engineer, Canada
- Dr. Puji Astuti, *Immunology*, Gajah Mada University, Indonesia
- Dr. Salima Kebbouche-Gana, *Microbial Ecology*, Université M'Hamed Bougara de Boumerdes – Alzajair
- Dr. Sulistyono, *Fisheries Biology*, Bogor Agricultural University, Indonesia
- Dr. Tjahjo Winanto, *Mariculture*, Jenderal Soedirman University, Indonesia
- Dr. Tri Prartono, *Chemical Oceanography*, Bogor Agricultural University, Indonesia
- Dr. Yusni Ikhwan Siregar, *Ecophysiology*, Riau University, Indonesia
- Dr. Zobaer Hasan, *Genetic*, Hiroshima University Hospital, Japan
  
- Fadil Nandhila, *Ecolabelling*, NGO-Indonesia
- Agung Cahyo Setyawan, *Parasitology*, Jenderal Soedirman University-Indonesia
- Rose Dewi, *Microalgae*, Jenderal Soedirman University-Indonesia

## Guide for Authors :

---

### Introduction :

The official language of the journal is either Bahasa Indonesia or English

### Types of paper :

- **Research Articles:** Original and unpublished work e.g. controlled trials, intervention studied, studies of screening and diagnostic test, cost effectiveness analyses, case-control series, and surveys or monitoring program. Generally, manuscripts should not exceed 8,000 words, the maximum word length being 10,000 can be accepted after consultation with Editor-in-Chief. The length of a paper should be commensurate with the scientific information being reported. In particular, the introductory material should be limited to a few paragraphs and results presented in figures should not be repeated in tables.
- **Short Communication:** A brief communication of urgent matter or the reporting of preliminary findings to be given expedited publication. Maximum 4000 words excluding references and abstract and up to 15 references.
- **Reviews:** Critical assessments of literature and data sources. Those wishing to prepare a review should first consult the Editors or Associate Editors concerning acceptability of topic and length.
- **Special Issues.** Series seminar, proceedings of symposia, workshops and/or conferences will be considered for publication as a special issue.

### Article structure

#### Title.

Concise and informative. Avoid abbreviations<sup>1</sup> and formulae where possible. No more than 20 words.

#### Author names and affiliations.

Where the family name may be ambiguous (e.g., a double name), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation, including the country name and, if available, the e-mail address of each author. Please indicate the **corresponding author** who will handle correspondence at all stages of refereeing and publication, also post-publication.

#### Abstract

A concise and factual abstract is required. The abstract should state briefly the purpose of the research, methodology, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, References should be avoided, but if essential, then cite the author(s) and year(s). Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. No more than 250 words.

---

<sup>1</sup> Define abbreviations that are not standard must be defined at their first mention in abstract and/or in the manuscript body. Ensure consistency of abbreviations throughout the article.

### **Keywords**

Immediately after the abstract, provide a maximum of 5 keywords, general and plural terms should be avoided.

### **Introduction**

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

### **Material and methods**

Provide sufficient detail to allow the work to be reproduced. Methods already published should be indicated by a reference: only relevant modifications should be described.

### **Results and Discussion**

Results should be clear and concise. Discussion should explore the significance of the research work while extensive citations and discussion of published literature should be avoided. A separate Results and Discussion is often appropriate.

### **Conclusions**

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section.

### **Acknowledgements**

Acknowledgements contains a list of individuals who provided help during the research (e.g., sampling taken, providing language help, writing assistance or proof reading the article, etc.).

### **References**

#### *Citation in text*

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Any references cited in the abstract must be given in full. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text

#### *Web references*

As a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

#### *Reference style*

References should be arranged first chronologically and then further sorted alphabetically if necessary.

Examples in the manuscript body :

"...The application of marine bioremediation in Indonesian water is relatively new (Weber et al., 1994a; Weber et al., 1994b; Heipieper et al., 1995). Biomass estimations were calculated according to Smith et al. (1986). White et al. (2014) have recently shown ...."

Example in reference list : References should be arranged first alphabetically and then further sorted chronologically. One reference from the same author(s) in the same year must be identified by the

letters 'a', 'b', 'c', etc., placed after the year of publication.

*Reference to a journal publication:*

Syakti, A.D., Acquaviva, M., Gilewicz, M., Doumenq, P., Bertrand, J.-C. 2004. Comparison of n-eicosane and phenanthrene degradation by pure and mixed cultured of two marine bacteria. *Environmental Research* 96, 206–218.

*Reference to a book:*

Forstner, U., Wittmann, G.T.W. 1979. *Metal Pollution in the Aquatic Environment*. Springer-Verlag, New York. 489 pp.

*Reference to a chapter in an edited book:*

Kroppenstedt, R.M. 1985. Fatty acid and menaquinone analysis of actinomycetes and related organisms. In: Goodfellow, M., Minnikin, D.E. (Eds.), *Chemical Methods in Bacterial Systematic*. Academic Press, London, pp. 173–199.

**Additional notes:**

**Subdivision - numbered sections**

Divide your article into clearly defined and numbered sections. Subsections should be numbered 1. (then 1.1., 1.2., ...), 2, (then 2.1., 2.2., etc). (the abstract is not included in section numbering).

**Figure captions**

Ensure that each illustration has a caption. A caption should comprise a brief title (**not** on the figure itself) and a description of the illustration. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used.

**Tables**

Number tables consecutively with Arabic numerals in accordance with their appearance in the text. Avoid vertical rules. Be sparing in the use of tables and ensure that the data presented in tables do not duplicate results described elsewhere in the article. Tables should never be included within the text, because file(s) containing tables are attached separately in the electronic submission system.
